

工具

idea 2020.3

tomcat 8.0.33

git

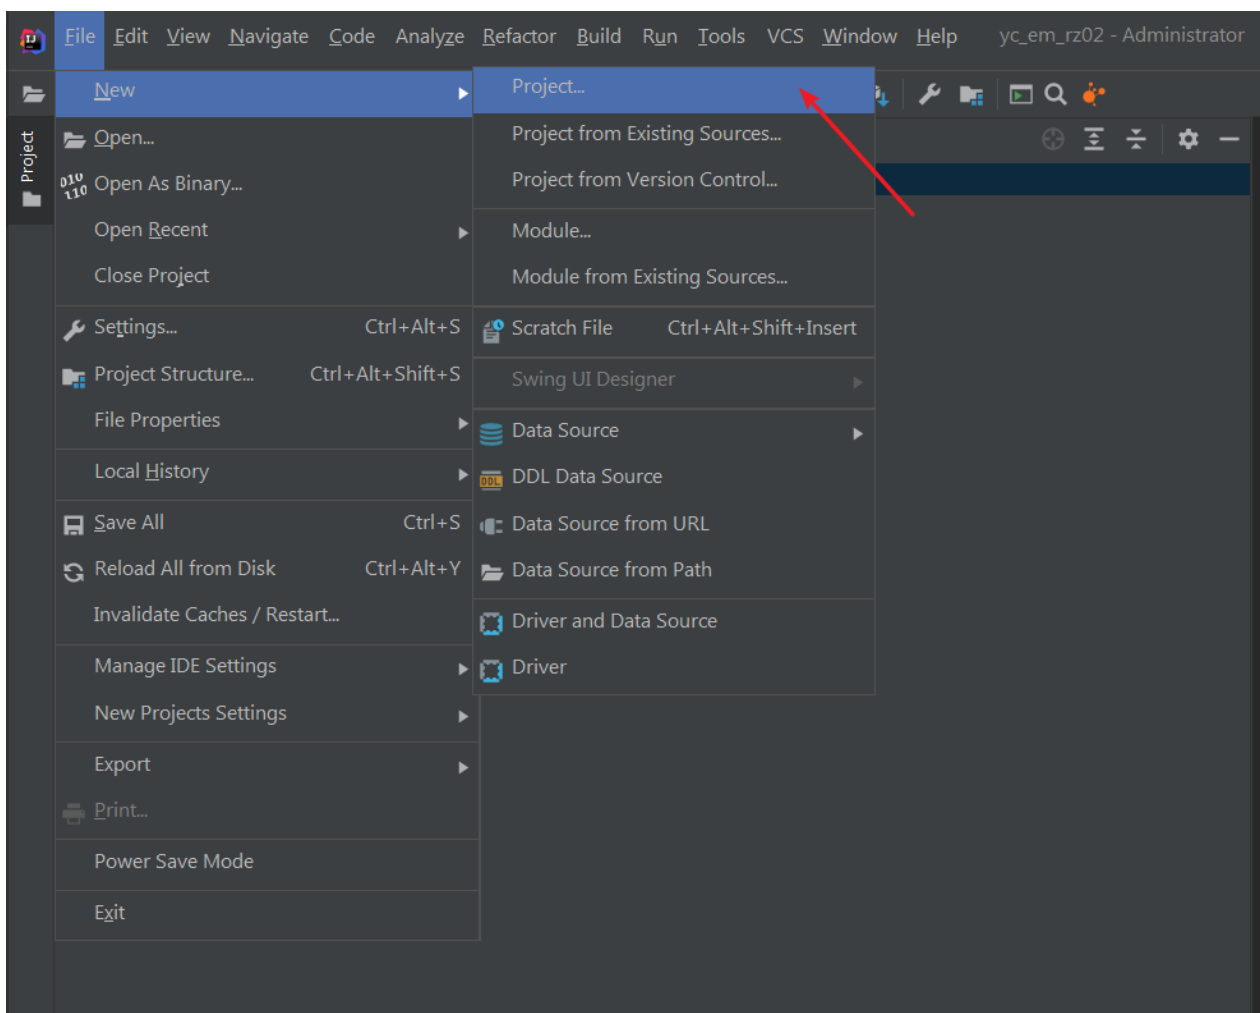

步骤

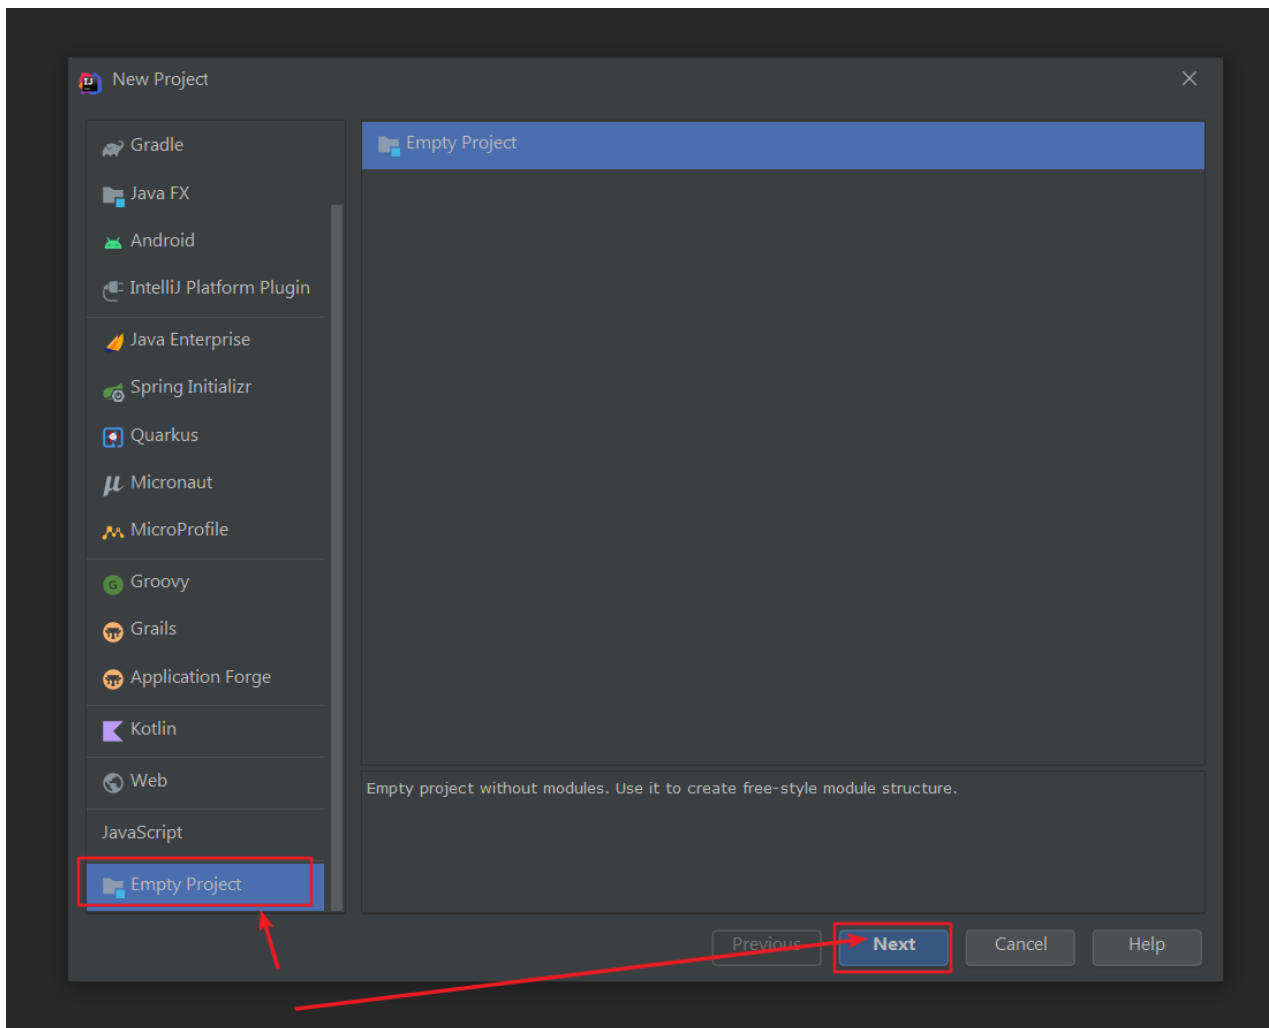

1. clone项目

1. 新建项目文件夹
2. 打开git 终端 运行 `git clone [仓库地址]`

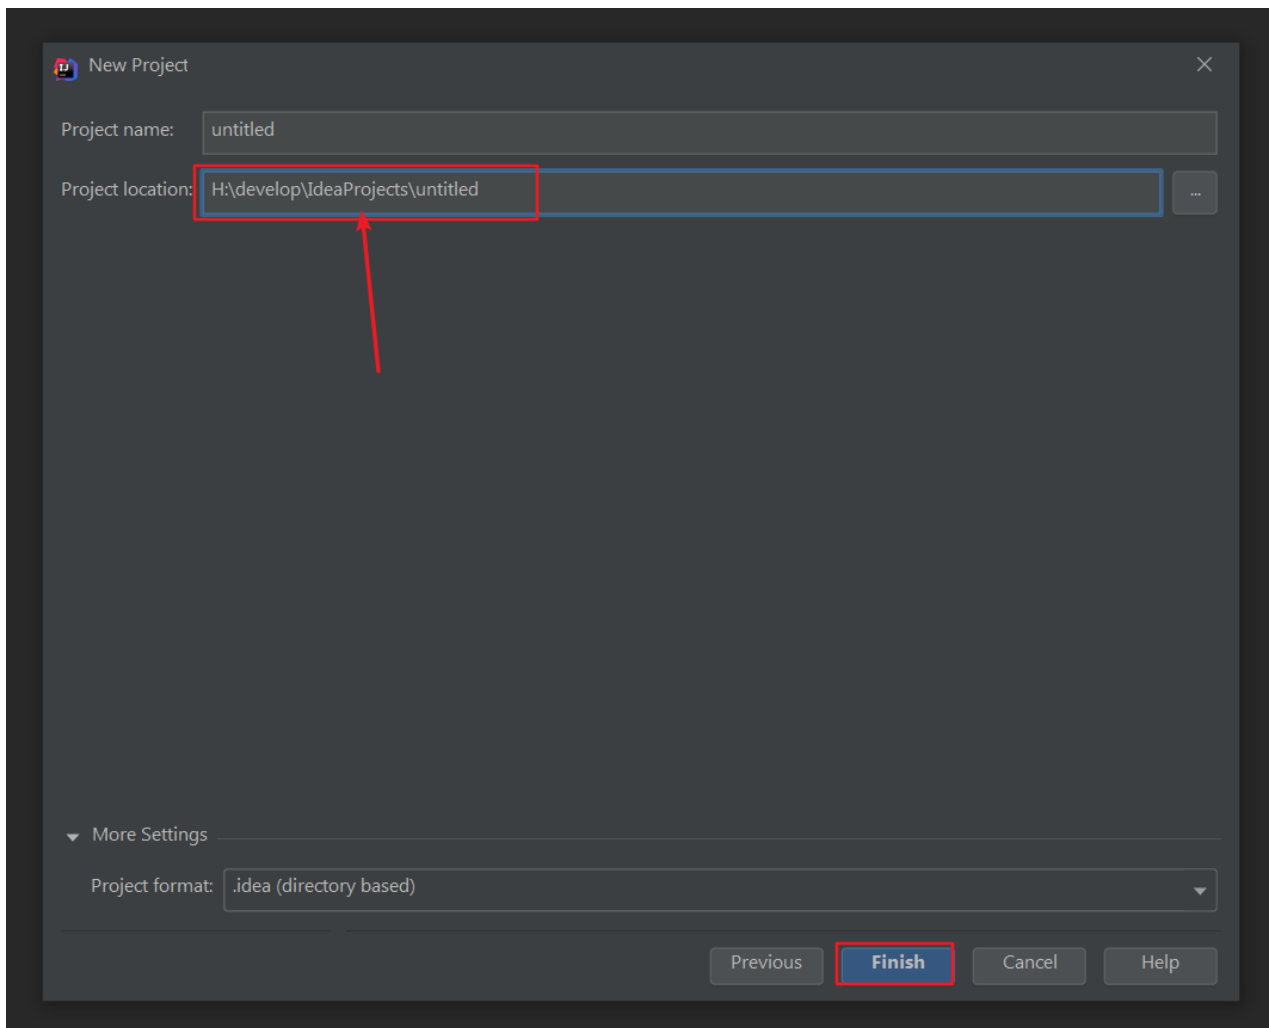

2. idea导入项目

1. 打开idea 创建新项目

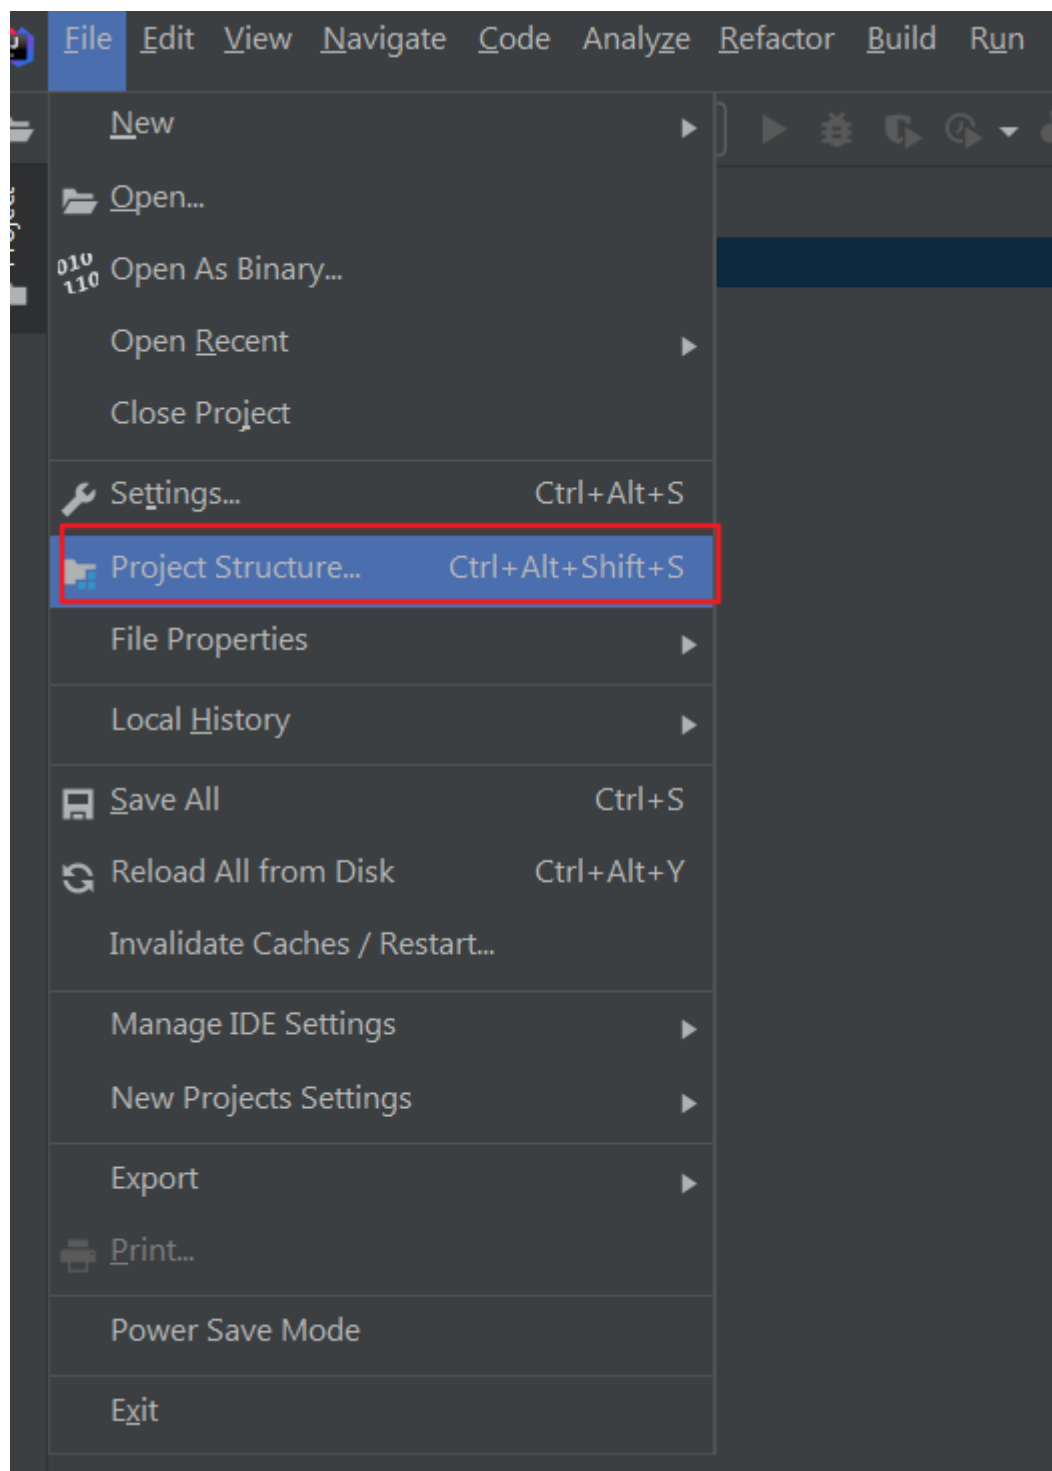

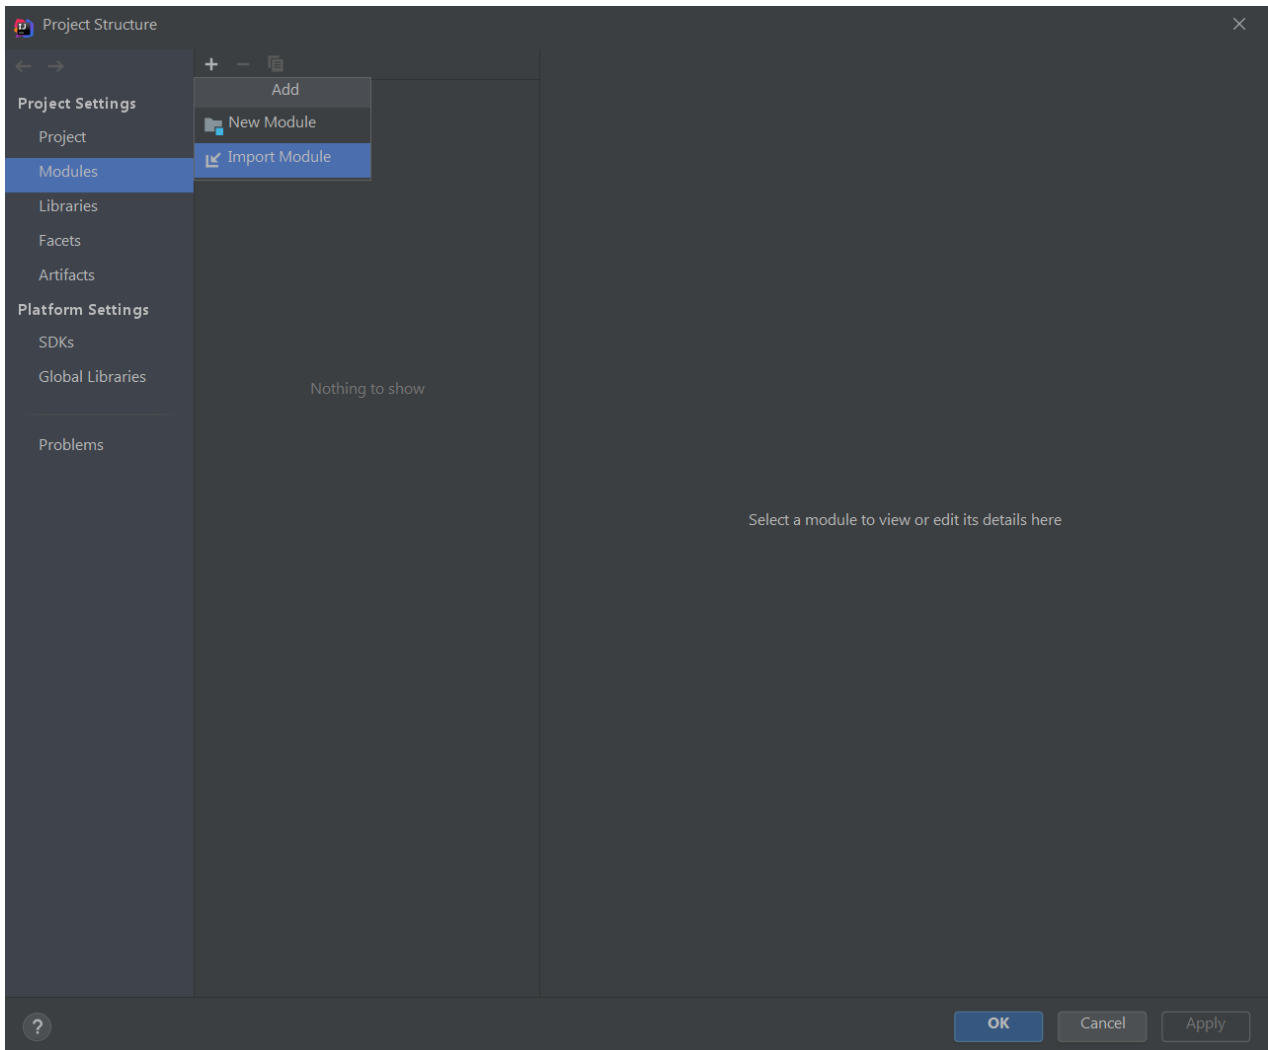

填写项目文件夹路径

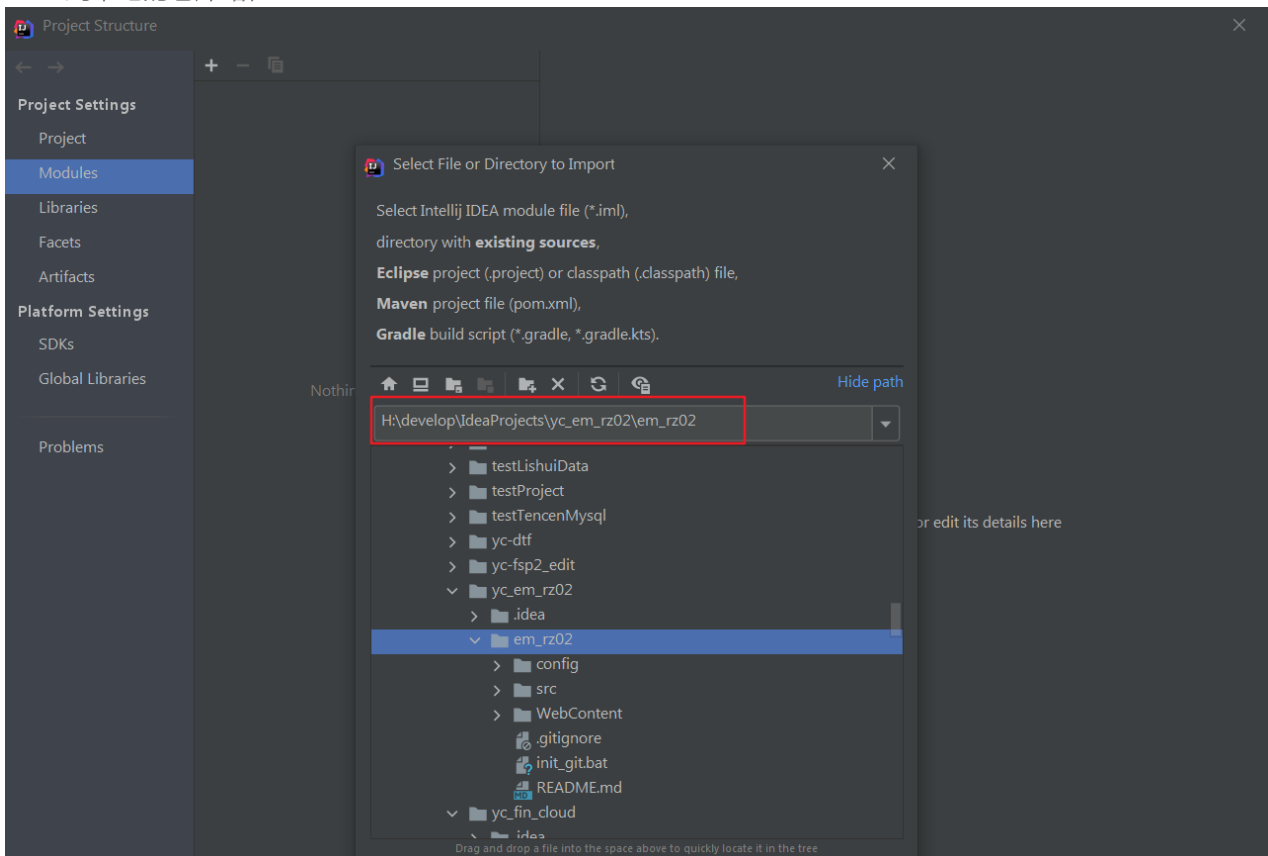

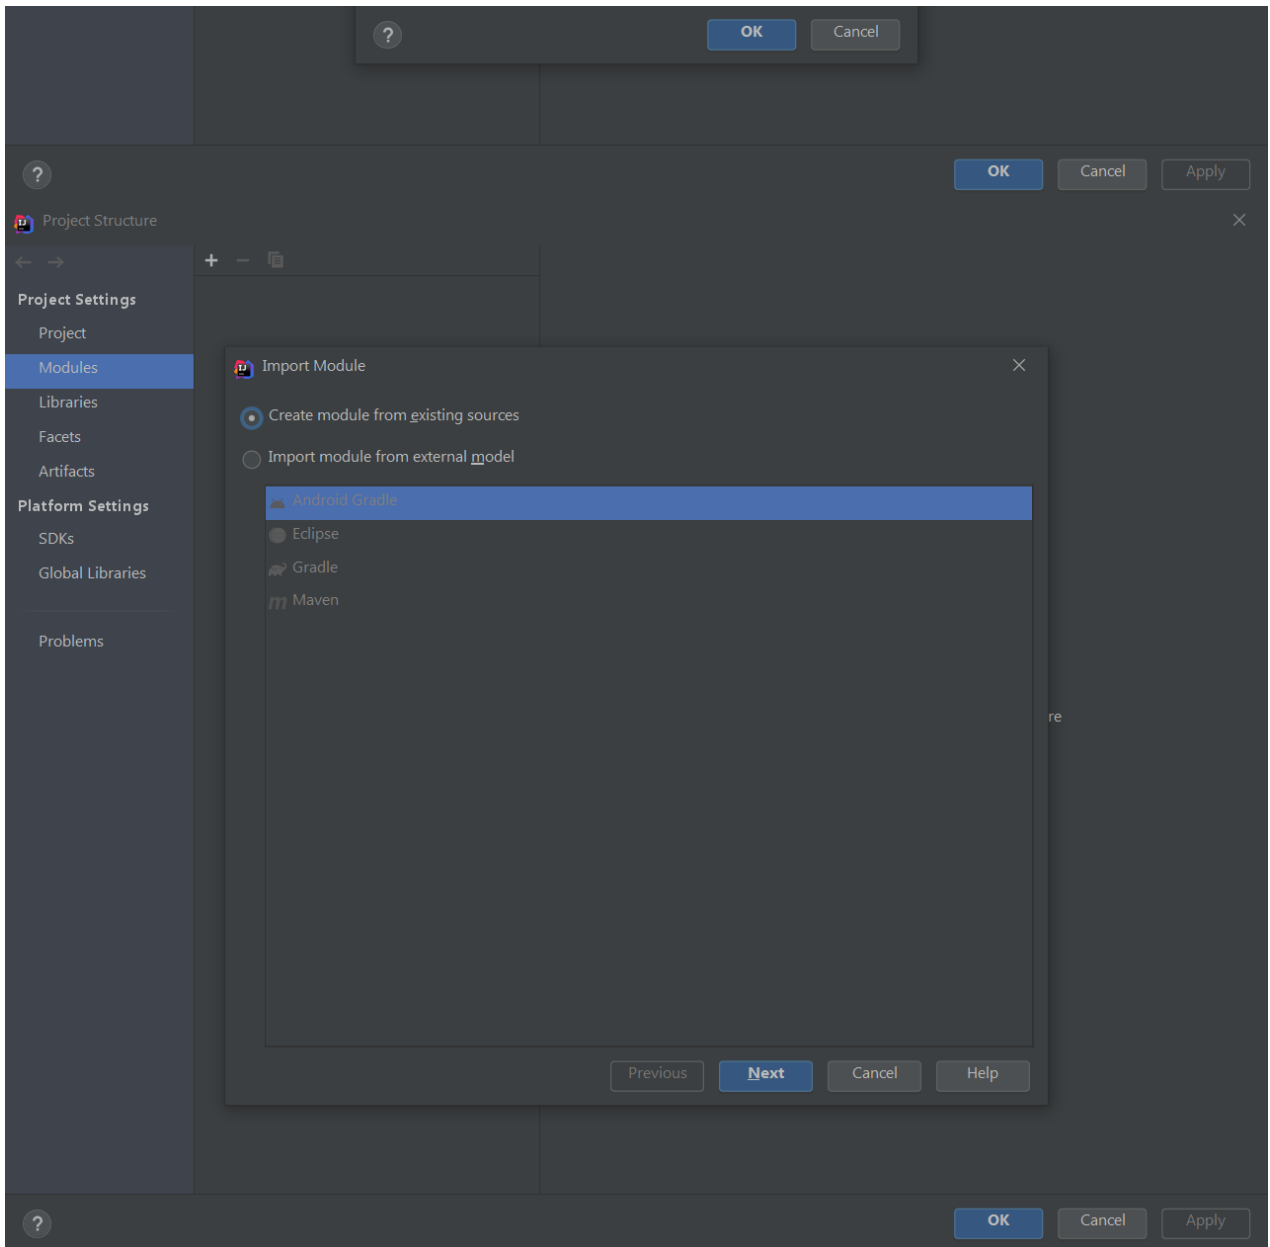

2. 导入clone的项目,进入clone的项目目录 git 终端 运行 `git checkout dev`
3. idea 导入clone 的项目

clone到本地的仓库路径

Import Module

Source files for your project have been found. Please choose directories that will be added to the project roots. These paths correspond to default (root, unnamed, top level) packages.
Note: the program will recognize only source files that are located under these directories.

H:\develop\IdeaProjects\yc_em_rz02\em_rz02\src

Help

webcontent 下web-inf创建classes文件夹

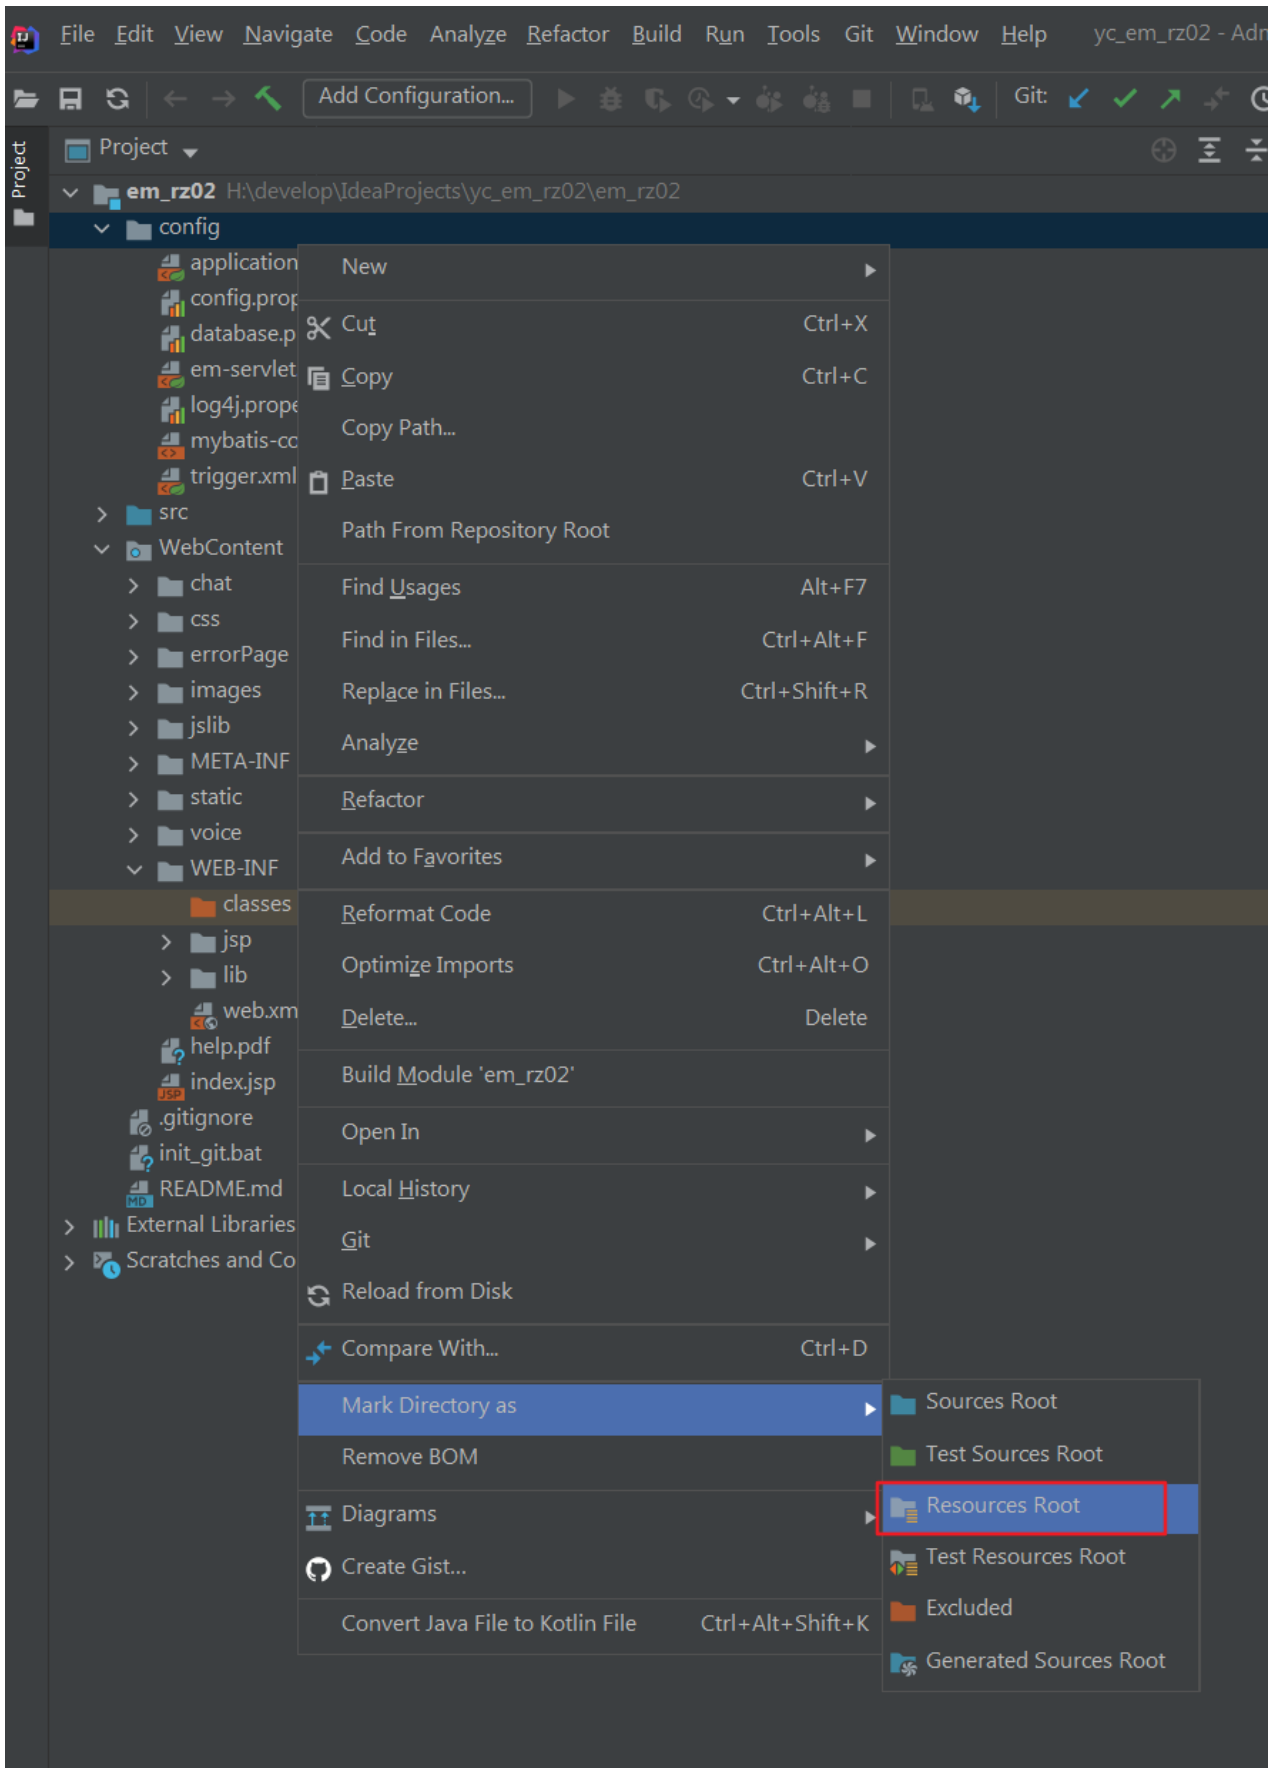

填入classes文件夹路径

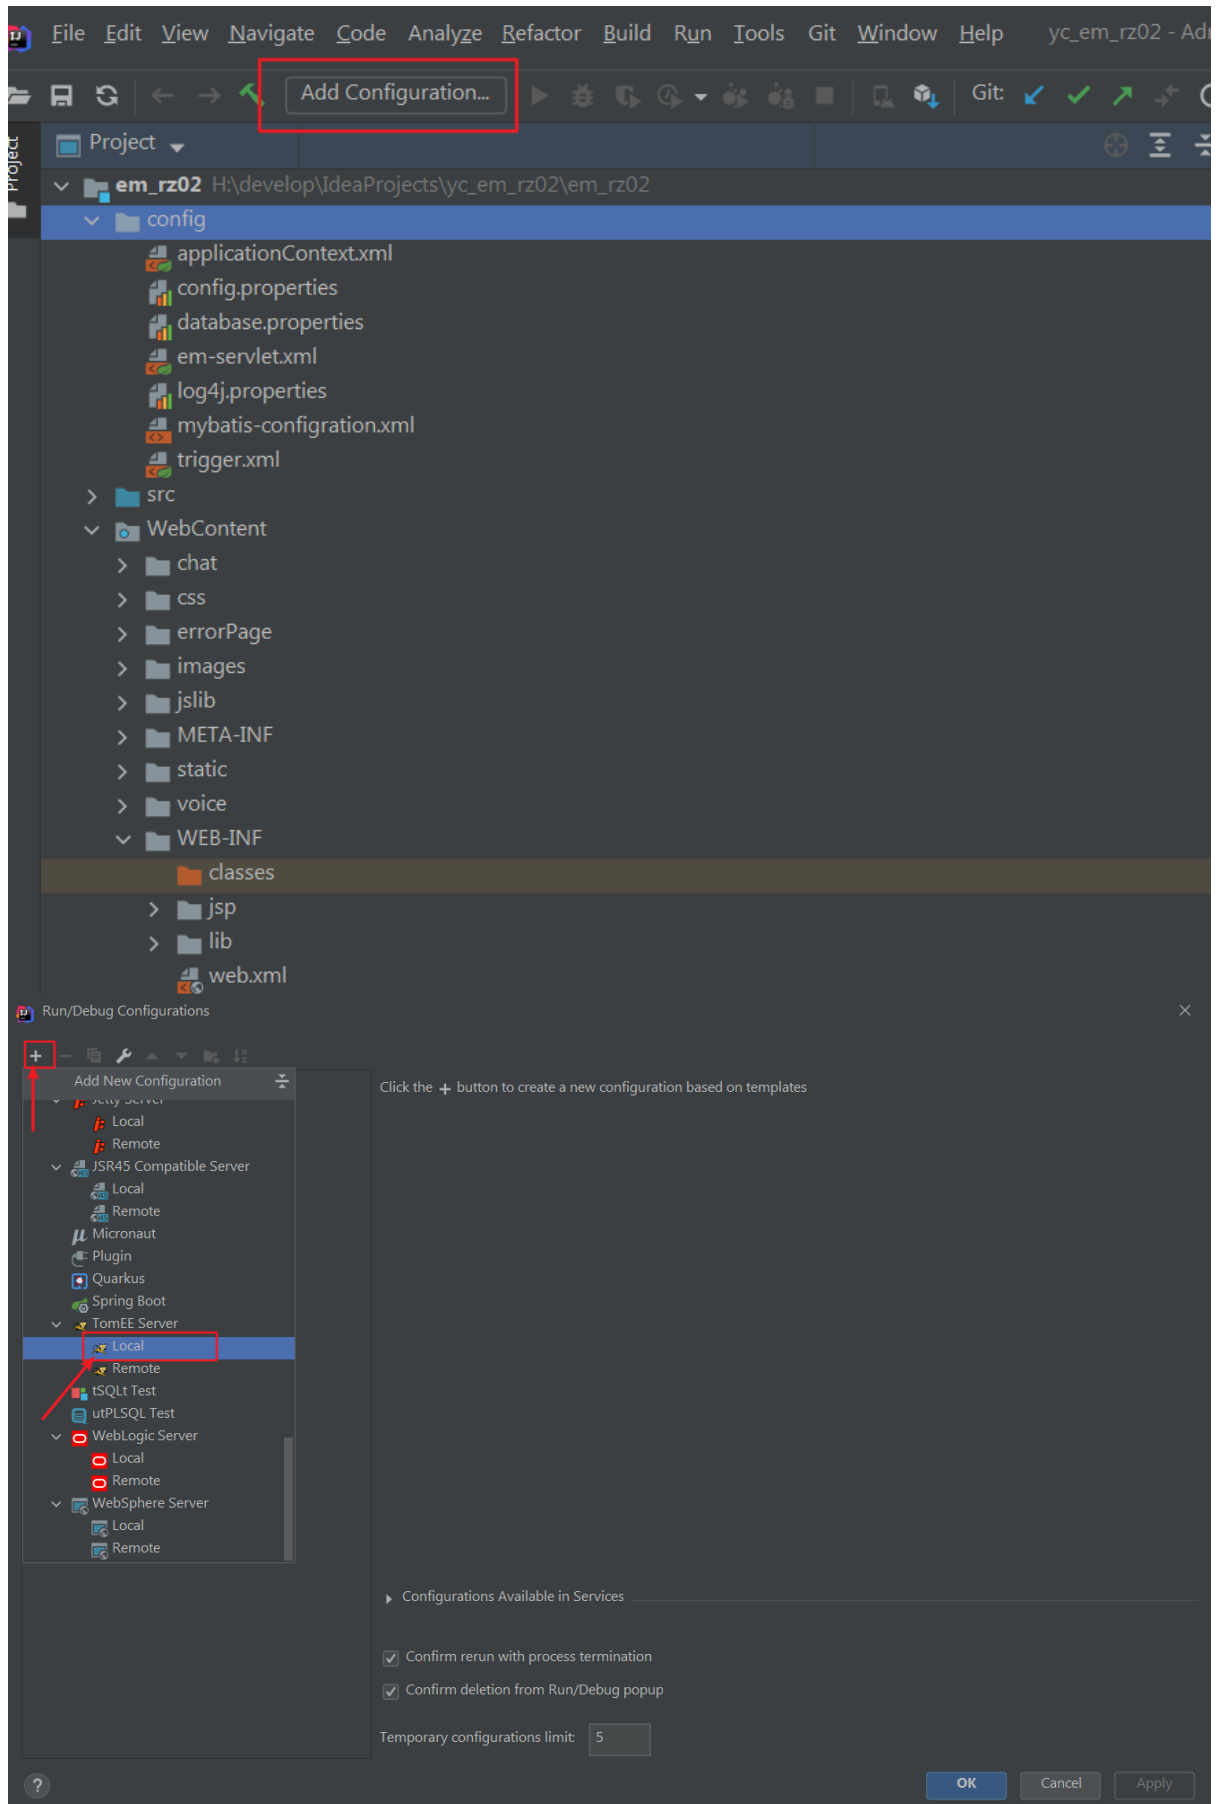

设置config为resources文件夹

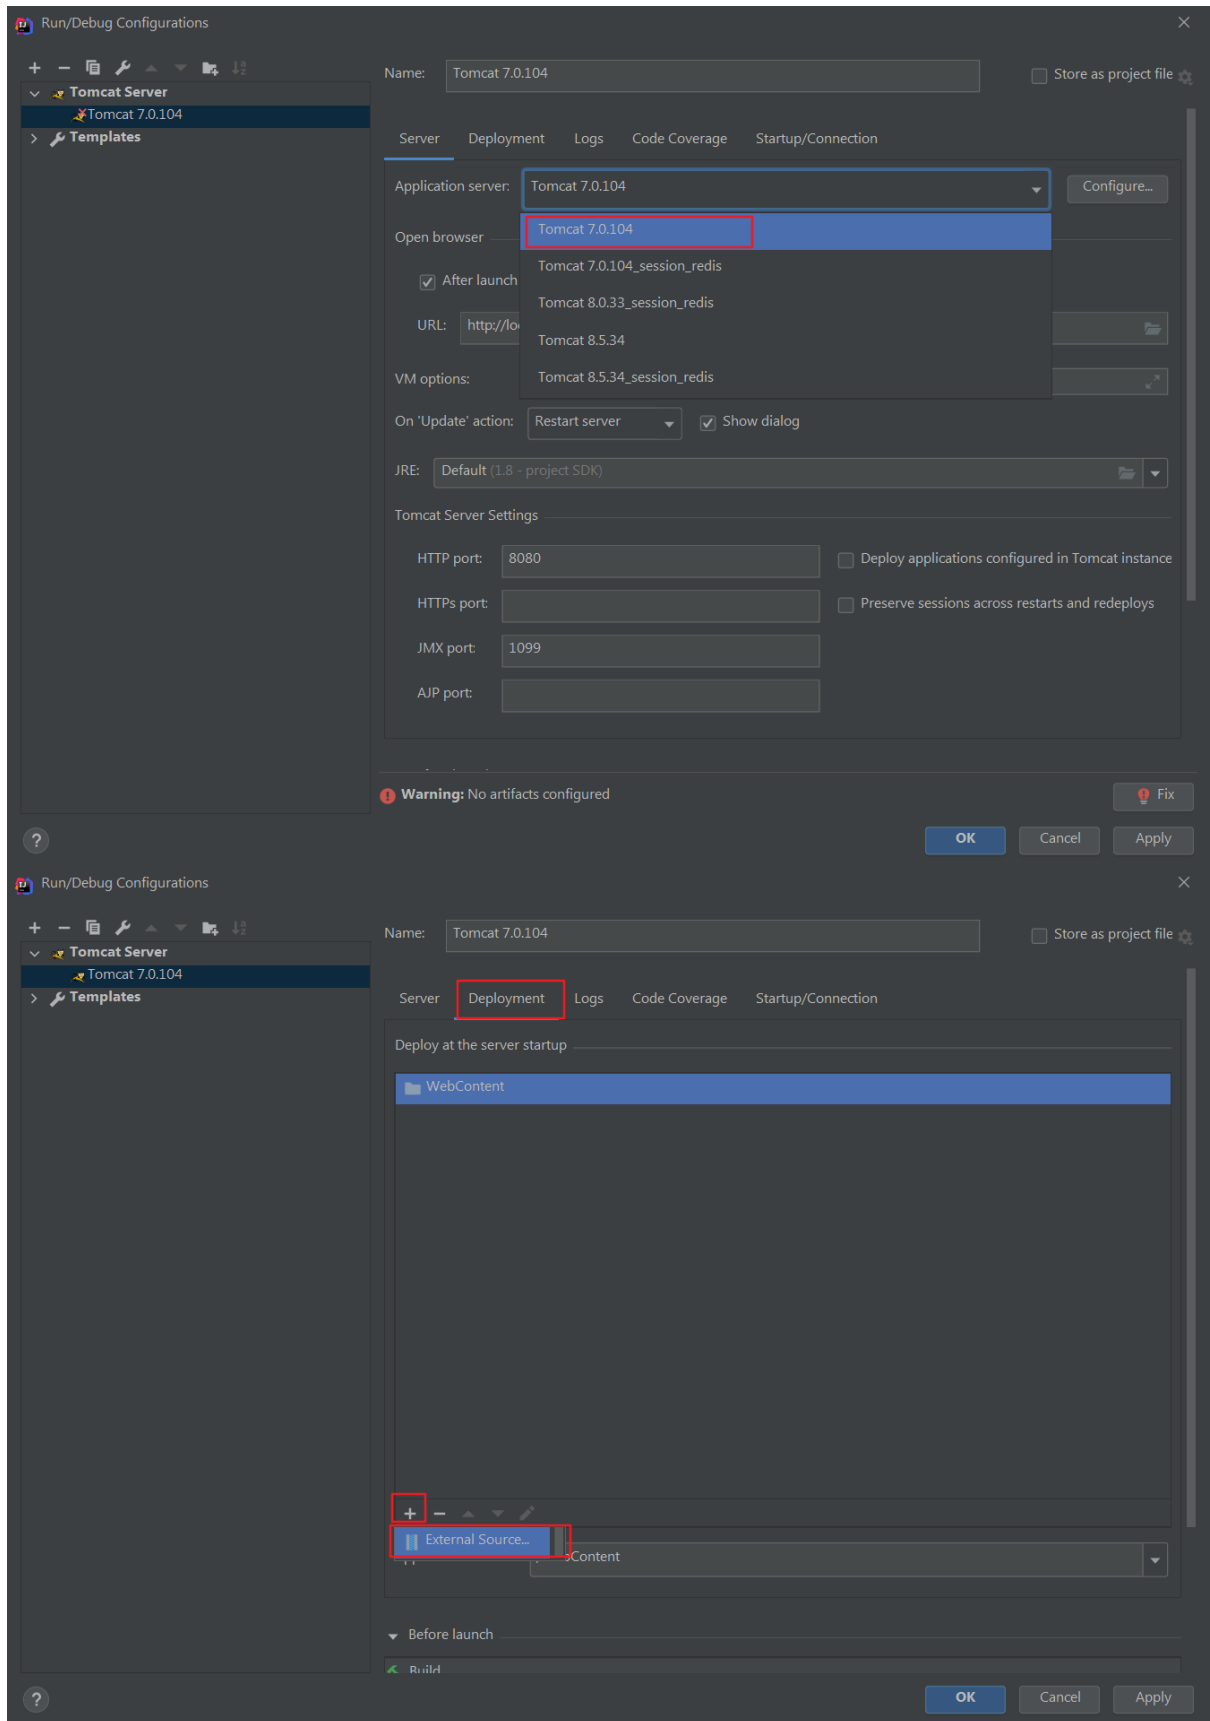

3. 运行项目

1. 添加tomcat

不同项目 tomcat 可能不同

选择webcontent文件夹
